Good. Should be read with Code of IronBy Dennis O'SullivanGood. Should be read with Code of Iron..

"Go To Your Roots" is a phrase which has been gaining increased impetus and significance among the 21st century Euro-Heathen Tribes throughout the Western World. Whether one currently aspires to Norse Heathenism, Celtic, Druid, Slavic or the Olympian pantheon, the rapid decline of the West that we are witnessing all around us, brings with it a rekindled and unavoidable 'Revelation of Thought' among those who understand the vital importance of returning to their indigenous roots of being. The mightiest oak tree cannot stand for long without its roots to support it. Likewise, any building without a strong foundation will also topple easily. The strength of any nation are its people, but just people alone, no matter how high in number will not sustain their identity very long without the foundation of unity, culture, traditions, myths and legends and ancestral gods. The writings of author Ron McVan have been circulating throughout the Euro-Tribe Heathen circles for over 25 years and remain a font of guiding inspiration, knowledge and ethnic awakening. In his most recent release, "The Book of Wotan", the author has accumulated a virtual treasure of information on the Teutonic Allfather god Wotan, along with a variety of additional writings from leading Wotanist thinkers and scholars from Thomas Carlyle to the current Euro-Heathen writers of our times. As with all of Ron McVan's previous books, they are lavishly illustrated and laced with many of the authors inspirational poems. Included also in "The Book of Wotan" the reader will find the full Havamal (words of the High One, Wotan), The Voluspa (Prophecy of the Volva) and much more pertinent knowledge of interest and value to those who aspire to the Wotan Path and pantheons of the Euro-Tribes.

About the AuthorRon McVan has followed a lifelong career in the fine arts as an oil painter, sculptor, poet, writer, stained glass artisan, jewelry craftsman and musician. His extended interests have always been wide and varied, ranging foremost in the martial arts, philosophy, the ancient mysteries, mythology, Euro-history and heritage,

comparative religions and spiritual studies most particularly in Wotanism, Druidism and Hermeticism. Acutely sensitive to the rapid decline of Western Culture, the relentless unconscious abuse of Nature and Earth, and the cultural decay and exploitation of America by avaricious "Power Elite" exploiters, the artist has made it his personal life quest through the past 40 years to awaken and enlighten all those of Euro-heritage both young and old to the indigenous ethnic roots of their ancestors. In this book "Way of the Druid" as in all of the author's writings, the reader will experience a rich tapestry of knowledge and inspiration, with an awesome revelation of personal and folkish awakening reaching out to the modern world through the vastness and enlightening heritage of ancient days.
